

FISHER & PAYKEL

**INTEGRATED
REFRIGERATOR FREEZER**

RB60V18 & RB60V18M

INSTALLATION GUIDE / USER GUIDE
NZ AU UK IE EU HK IN SG

Control panel

Note: control panel shows all icons and options available on the control panel where in fact icons and options will only be visible when they have been selected or interacted with.

① Power Off/On ①

Press ① to turn the appliance off or on.

- To turn the refrigerator off hold the ① button for 3 seconds, the control panel will not function.
- To turn the refrigerator on hold the ① button for 3 seconds, the control panel will function as normal.

② Compartment select button

Press this button to scroll through the refrigerator, variable-temperature drawer and freezer compartments. The Compartment icon (③) will illuminate each of the compartments successively with each press of the button (②).

④ Temperature select button

Press this button to scroll through the temperatures available for each of the compartments. The Temperature display (⑤) will show each of the available temperatures successively with each press of the button (④).

⑥ Menu select button

Press this button to scroll through the special functions: Fast Freeze , Max Cool , Holiday Mode  and Fridge Off . Each of the special functions icons (⑦) will illuminate with each press of the button (⑥).

OPERATING INSTRUCTIONS

When you turn your refrigerator on for the first time, the cooling system will automatically cool all compartments to their set temperatures.

Default setting for refrigerator compartment temperature

Default setting for freezer compartment temperature

Setting/changing the temperature of a compartment

- ① Press the 'Compartment' select button to scroll through the compartments indicated on the compartment icon. Stop when the compartment you wish to set is illuminated eg the refrigerator compartment.

Selecting the refrigerator compartment

- ② Press the 'Temperature' select button to scroll through the available temperatures for that compartment. Stop when your desired temperature is displayed eg 3°C.
- The selected temperature and compartment will flash and then the temperature display will revert back to the actual measured temperature.

Available refrigerator compartment temperatures:

2°C, 3°C, 4°C, 5°C, 6°C, 7°C, 8°C

Available variable-temperature drawer temperatures:

-5°C, -4°C, -3°C, -2°C, -1°C, 0°C, 1°C, 2°C, 3°C

Available freezer compartment temperatures:

-24°C, -23°C, -22°C, -21°C, -20°C, -19°C, -18°C, -17°C, -16°C, -15°C

Setting a special function

Fast Freeze

This function helps you get the best possible results when freezing fresh food. 'Fast Freeze' boosts the freezing speed by dropping the freezer compartment to a colder temperature for a preset time to ensure freshness, texture and taste are retained during the freezing process.

To activate and deactivate 'Fast Freeze':

- To activate the 'Fast Freeze' press the 'Menu' select button once. The  icon will start to flash. After 5 seconds the  icon will stop flashing and remain illuminated indicating that 'Fast Freeze' has been activated.
- 'Fast Freeze' will automatically deactivate. However if you wish to manually deactivate 'Fast Freeze' press the 'Menu' select button once. The  icon will flash then turn off and the freezer compartment will return to its previously set temperature.

Activating and deactivating 'Fast Freeze'

For best results we recommend that you activate this function before it is required.

Max Cool

Having the refrigerator door open for long periods of time or loading the refrigerator full of warm food (such as after a trip to the supermarket) will raise the temperature of the compartment. 'Max Cool' boosts the cooling power by dropping the refrigerator to a colder temperature for a preset time, thereby ensuring vital nutrients, freshness, texture and taste are retained.

To activate and deactivate 'Max Cool':

- To activate 'Max Cool' press the 'Menu' select button twice. The  icon will start to flash. After 5 seconds the  icon will stop flashing and remain illuminated indicating that 'Max Cool' has been activated.
- 'Max Cool' will automatically deactivate. However if you wish to manually deactivate 'Max Cool' press the 'Menu' select button twice. The  icon will flash then turn off and the refrigerator compartment will return to its previously set temperature.

Activating and deactivating 'Max Cool'

For best results we recommend that you activate this function approximately 2 hours before it is required. Alternatively activate this function when placing a load of fresh food into the refrigerator compartment.

Holiday Mode

This function allows your refrigerator to run at an efficient state to save you energy when you are away. Be sure to remove any perishable food items or items close to their expiry dates before activating the 'Holiday Mode'.

To activate and deactivate 'Holiday Mode':

- To activate 'Holiday Mode' press the 'Menu' select button three times. The  icon will start to flash. After 5 seconds the  icon will stop flashing and remain illuminated indicating that the 'Holiday Mode' has been activated.
- 'Holiday Mode' will not deactivate automatically. Once you return from holiday, press the 'Menu' select button three times. The  icon will flash then turn off and the appliance will return to normal operation.

Activating and deactivating 'Holiday Mode'

Fridge Off

This function turns the refrigerator compartment and variable-temperature drawer off while the freezer compartment operates as normal. Be sure to remove all items from the refrigerator and variable-temperature drawers before activating 'Fridge Off'.

To activate and deactivate 'Fridge Off':

- To activate 'Fridge Off' press the 'Menu' select button four times. The  icon will start to flash. After 5 seconds the  icon will stop flashing and remain illuminated indicating that 'Fridge Off' has been activated.
- 'Fridge Off' will not deactivate automatically. Once you require your refrigerator compartment and variable-temperature drawer to cool, press the 'Menu' select button four times. The  icon will flash then turn off and the refrigerator and variable-temperature drawer will return to their previously set temperatures.

Activating and deactivating 'Fridge Off'

The 'POWER' button is not equivalent to turning off the power at the wall.

For cleaning and maintenance, the appliance must be disconnected from the power supply at the wall socket.

Display screen

The display screen will remain illuminated while the refrigerator door is open.

Power failure memory function

The fridge will keep its original settings when power is restored after a power failure. Additionally it will automatically recall and reset the process of quick cooling in the refrigerator, variable temperature drawer and freezer compartments.

Using your refrigerator

- When switched on, the refrigerator will take several hours to cool.
- You can start to store food in it 2 – 3 hours after it has been turned on.
- The refrigerator and variable-temperature drawer compartment temperatures will automatically default to settings suitable for the storage of fresh food items and the freezer compartment will default to a setting suitable for frozen food items. To change these settings refer to 'Operating instructions' section.
- After placing food in the refrigerator, leave it to stabilise for 24 hours. After this time you may wish to alter the temperature.

Loading the refrigerator with food

- Do not store too much food in the freezer. It is recommended not to exceed the load line of the drawers.
- The total weight of the food per shelf should not exceed 24kg in the fridge compartment.

Door alarm

If the refrigerator door has been left open for more than 60 seconds, an alarm will sound to alert the user to close the door.

INTERIOR FEATURES

Variable-temperature drawer

This drawer is controlled by a separate system to the refrigerator and freezer compartments to provide you with greater flexibility of food storage.

Different foods require different storage temperatures so we have designed this drawer to operate from -5°C to 3°C . This enables you to set the perfect temperature based on what you are storing in the drawer.

The variable-temperature drawer is suitable for storing fruit and vegetables as well as dairy products, deli products and fresh meats.

- The 3°C setting is suitable for most fresh, perishable food items such as fruit and vegetables, dairy products and deli items.
- If you are storing fruit and vegetables, keep the drawer set at 3°C and loosely wrap your produce in plastic bags. This will reduce moisture loss and prevent excess moisture build-up.
- To store fresh meat, adjust the temperature to a lower (colder) setting eg -1°C . Ensure the meat is fresh when purchased and covered or wrapped-well during storage.

The variable-temperature drawer

INTERIOR FEATURES

Shelves

Your refrigerator is fitted with shelves specially designed to retain spills, making clean up easier.

- The shelves can be repositioned at different heights to accommodate different food storage container sizes and heights.
- To remove the shelf, use the front edge to pull the shelf forward (**A**).

Fruit and vegetable bin

The fruit and vegetable bin provides a humid environment for your produce ensuring moisture is retained, nutrients are locked in and your fruit and vegetables are kept fresher for longer.

- To remove the bin, pull it out until it stops, then lift and continue to slide the bin until it is fully extended.

Fruit and vegetable bin humidity slide

The bin has a humidity control slide that can be adjusted to fruit or vegetable setting depending on what is being stored in the bins.

- If you are storing fruit, set the humidity slide to the fruit setting (left side).
- If you are storing vegetables, set the humidity slide to the vegetable setting (right side).
- If you are storing a mixture of fruit and vegetables, position the humidity slide in the centre.

Humidity mat

The humidity mat is designed to hold your fruit and vegetables off the base of the bin. This increases air flow around your produce thereby preventing rotting.

Door shelves

Door shelves can be moved to meet individual storage needs.

- To remove the door shelf, lift the shelf up (**B**) and pull straight out (**C**).
- To install, place shelf into desired door liner retainer, push down gently until shelf stops.

Replacement of the interior light

The LED lighting in your refrigerator saves energy and has a long lifetime. However, if replacement of an LED is required, simply call your Fisher & Paykel trained and supported service technician and they will replace it for you.

Interior light: 12V, max 2.5W.

Interior

- It is important to keep the interior of the refrigerator and freezer clean to help prevent food from becoming contaminated during storage.
- The amount and types of food stored determines how often cleaning should be carried out (ideally once every 1 to 2 weeks) in the refrigerator.
- Remove the shelves, door shelves and bins and rinse these parts in a mixture of warm water and liquid dishwashing detergent. Rinse and dry the shelves and bins thoroughly before replacing them into the refrigerator.
- Wipe over the interior surfaces with a mixture of warm water and liquid dishwashing detergent or baking soda dissolved in warm water (add 1tsp of baking soda to each 500mls of water). Rinse with clean water.
- To help remove “old stale refrigerator” smells add a few drops of vanilla essence or vinegar to the water before cleaning.
- Do not use harsh, abrasive cloths or cleaners or highly perfumed, strong smelling cleaners or solvents on any part of the refrigerator as they can cause damage.

Glass shelves

- Clean with warm water and detergent or a glass cleaner. If cleaning the shelves without removing from the cabinet, use only warm water and detergent as a glass cleaner can damage the plastic components of your refrigerator.

Exterior surfaces

- Clean exterior surfaces with warm water and detergent only.
- If necessary, clean the magnetic door gasket with an old toothbrush, and a mixture of warm water and liquid dishwashing detergent.

STORING FOOD IN YOUR REFRIGERATOR

There are recommended storage areas for various foods. As cold air circulates inside the refrigerator, there is a temperature difference within both the fresh food and freezer compartments.

COMPONENTS

Humidity controlled bin

This bin helps to provide a humid microclimate to extend the storage times of fruit and vegetables.

Shelving

Selectable shelf heights.
Heat treated safety glass.
Adjustable door shelves.

Variable temperature compartment

This compartment enables you to set the perfect temperature between -5°C - 3°C based on what you are storing.

Freezer bins

Allows for easy storage of frozen items.

STORING FOOD IN YOUR REFRIGERATOR COMPARTMENT AND VARIABLE-TEMPERATURE DRAWER

Storing fresh, perishable foods in your refrigerator helps to extend storage times. The cold temperatures slow down the major causes of food spoilage—possible growth of bacteria, moulds and yeasts, and microbial chemical and physical reactions.

Fresh food care

The quality of food before it is placed in the refrigerator is critical to successful storage.

For best results:

- Select foods that are very fresh and of good quality.
- Buy only the amount that you will use within the recommended storage time. If you buy extra, plan to freeze it.
- Ensure that food is well wrapped or covered before it is stored. This will prevent food from dehydrating, deteriorating in colour or losing taste and will help maintain freshness. It will also prevent odour transfers. Vegetables and fruit do not need to be wrapped provided they are stored in the vegetable bins of the refrigerator.
- Make sure that strong smelling foods are wrapped or covered and stored away from foods such as butter, milk and cream which can be tainted by strong odours.
- Refrigerate fresh, perishable foods as soon as possible after purchase. If left at room temperature for any length of time the rate of deterioration will be accelerated.
- Avoid placing food directly in front of air outlets, as it may freeze. Cold air needs to circulate to maintain safe food storage. Do not open the refrigerator door unnecessarily.
- Cool hot foods down before placing them in the refrigerator. This should be done quickly. It can be aided by placing the container of food in a bowl of ice and water; renew the ice as necessary. (Note: hot containers may damage shelves and walls of the refrigerator).
- Store raw and cooked foods in separate containers or packaging to prevent cross contamination.
- Storing at temperatures other than settings recommended may impact the storage life.
- For common foodstuffs, factory default setting (mid-mid) provides the optimum setting for foodcare.

In addition:

- Keep the refrigerator clean. Wipe the inside walls and shelves frequently (refer to 'Cleaning care' on page 37) and place only clean containers in the refrigerator.
- Keep a close check on the quality of food in your refrigerator. Discard any food that shows signs of spoilage. Pay particular attention to meat, fish and poultry, as these foods are highly perishable. Use food within the recommended storage times.

STORING FOOD IN YOUR REFRIGERATOR COMPARTMENT AND VARIABLE-TEMPERATURE DRAWER

Dairy foods and eggs

- Most pre-packed dairy foods have a recommended 'use by/best before/best by' date stamped on them. Store them in the refrigerator and use within the recommended time.
- Butter can become tainted by strong smelling foods so it is best stored in a sealed container.
- Eggs should be stored in the refrigerator. For best results, especially when baking, remove the eggs from the refrigerator two hours before use.

Red meat

- Place fresh red meat on a plate and loosely cover with waxed paper, plastic wrap or foil.
- Store cooked and raw meat on separate plates. This will prevent any juices lost from the raw meat from contaminating the cooked product.
- Delicatessen meats should be used within the recommended storage time.

Poultry

- Fresh whole birds should be rinsed inside and out with cold running water. Dry and place on a plate. Cover loosely with plastic wrap or foil.
- Poultry pieces should also be stored this way. Whole poultry should never be stuffed until just before cooking, otherwise food poisoning may result.
- Cool and refrigerate cooked poultry quickly. Remove stuffing from poultry and store separately.

Fish and seafood

- Whole fish and fillets should be used on the day of purchase. Until required, refrigerate on a plate loosely covered with plastic wrap, waxed paper or foil.
- If storing overnight or longer, take particular care to select very fresh fish. Whole fish should be rinsed in cold water to remove loose scales and dirt and then patted dry with paper towels. Place whole fish or fillets in a sealed plastic bag.
- Keep shellfish chilled at all times. Use within 1 – 2 days.

Precooked foods and leftovers

- These should be stored in suitable covered containers so that the food will not dry out.
- Keep for only 1 – 2 days.
- Reheat leftovers only once and until steaming hot.

Fruit and vegetable bins

- Although most fruit and vegetable varieties store best at low temperatures, take care not to store the following at temperatures of less than 7°C for long periods: Citrus fruit, melons, eggplant, pineapple, paw paw, courgettes, passionfruit, cucumber, peppers, tomatoes.
- Undesirable changes will occur at low temperatures such as softening of the flesh, browning and/or accelerated decaying.
- Do not refrigerate avocados (until they are ripe), bananas, mangoes or pepinos. If possible store fruit and vegetables separately, ie fruit in one bin and vegetables in the other.

STORING FOOD IN YOUR FREEZER

The use of temperatures of -18°C or colder to store food means that the food can be kept for longer periods than when refrigeration temperatures are used. This is because the growth of bacteria, moulds and yeasts are stopped, and microbial chemical and physical reactions are severely restricted at very low temperatures.

Frozen food care

For best results:

- Choose only high quality foods that freeze well.
- Store at -18°C or colder. Take care to maintain this low storage temperature, eg try to avoid opening the freezer door unnecessarily. If your ice cream is soft you are running your freezer too warm.
- Leave space at the top of containers, glass jars or plastic bags containing liquids or semi-solid foods as they expand during freezing. Usually 20 – 50mm head space is recommended. Seal well. Ideally, remove all the air from the package after food is frozen.
- Packages or containers of solid foods should have the air removed from them and be sealed tightly before freezing.
- Freeze immediately and as quickly as possible. Freeze only small quantities of food at any one time. For best results we recommend that only 1kg of food be frozen per 25L freezer capacity. (About 3kg in small freezers and 4kg in larger freezers).
- Do not pile frozen food around the fan cover. This can prevent adequate air circulation.
- Thaw foods preferably in a refrigerator, or using a microwave oven or multifunction oven.
- Keep a constant turnover of food. Use older items of food first. Do not exceed recommended storage times.
- Use good quality freezer proof packaging to maintain food quality.
- If food is only covered in plastic film place inside a freezer-proof plastic bag.
- Do not store foods to be frozen in contact with food for storage. If defrosting frozen food in the refrigerator compartment ensure frozen items are not in contact with fresh foods.
- Defrosting food repeatedly is not recommended. Frozen foods that will be used regularly should be stored in smaller quantities.

Recommended freezer storage times

These times should not be exceeded.

MONTHS	TYPE OF FOOD STORED
1	Bacon, casseroles, milk
2	Bread, ice cream, sausages, pies – (meat and fruit), prepared shellfish, oily fish
3	Non-oily fish, shellfish, pizza, scones and muffins
4	Ham, cakes, biscuits, beef and lamb chops, poultry pieces
6	Butter, vegetables (blanched), eggs whole and yolks, cooked crayfish, minced meat (raw), pork (raw)
12	Fruit (dry or in syrup), egg whites, beef (raw), whole chicken, lamb (raw), fruit cakes

STORING FOOD IN YOUR FREEZER

Meat, poultry and game

- Do not try to freeze more than 1kg meat per 25L freezer capacity. Meat must be frozen quickly in order to maintain its texture.
- Do not stuff poultry before freezing.
- Red meat can be cooked from frozen, or from the partly or completely thawed states. Remember to allow extra cooking time if cooking from frozen.
- Always thaw poultry completely before cooking.

Fish

- Fish is best frozen commercially. If, however, you do want to freeze fish at home, make sure the fish is very fresh and of high quality.
- Clean, scale and preferably leave whole. All fish should be wrapped in two layers of packaging as depending on the type of fish, odours and flavours can be readily transferred either to or from it. Seal well.
- For best results, cook from either the frozen or partly thawed state.

Vegetables

- Most vegetables freeze well, although 'salad' vegetables lose their crispness. Other vegetables, eg celery, onion and tomatoes, should only be used in cooked dishes as they soften on freezing.
- Freeze only high quality, mature, ready-to-eat vegetables.
- Sort and discard any that are damaged.
- It is necessary to blanch most raw vegetables prior to freezing.
- Blanching involves a short cooking period during which vegetable enzymes are destroyed. If these enzymes are not destroyed they cause undesirable physical and chemical changes during freezer storage.
- Vegetables can be blanched in boiling water, steam or in a microwave oven. If using boiling water, boil vegetables for 2 – 4 minutes and cool quickly.
- In general frozen vegetables are best cooked from their frozen state.

Prepared and cooked foods

- Most cooked foods can be frozen but it is not recommended to freeze the following:
- Cooked egg white, custards, cream fillings and milk puddings, gelatine or jelly-like dishes, mayonnaise and similar salad dressings, meringue toppings. These tend to separate on thawing.

Fruit

- Choose high quality, mature, and ready-to-eat fruit. Preferably select varieties recommended for freezing.
- Avoid unripe and over-ripe fruit.
- The way fruit is packed depends on how it is to be used. Fruits packed in syrup are ideal for desserts, whereas fruits packed without sugar are better used for cooking. Most fruits can be stored for 8 – 12 months.

TROUBLESHOOTING

If there is a problem with your appliance, please check the following points before contacting your local Fisher & Paykel trained and supported service technician or the Customer Care Centre.

Product parts and accessories can be purchased through Fisher & Paykel Customer Care Centre or online at www.fisherpaykel.com (this service is available to selected markets only).

PROBLEM	POSSIBLE CAUSE	WHAT TO DO
Appliance does not operate.	No electricity at power outlet.	Check that the plug is correctly connected and power switched on.
		Check another appliance at the same outlet.
		Check house fuse.
	The refrigerator is in the defrosting cycle.	This is normal for an automatic defrosting refrigerator.
	The refrigerator is turned off.	Press the ⓘ button for 3 seconds to start the refrigerator.
Light not working.	Light not functioning.	The light cannot be serviced by the user. Contact your Fisher & Paykel Dealer or Fisher & Paykel trained and supported service technician.
	Refrigerator not working.	See previous section above.
Motor operates for long periods.	Hot weather.	Minimise door openings to allow temperatures to stabilise.
	Frequent door openings.	
	Large amount of food recently added.	
	Temperature control set too low.	See 'Operating instructions' section on page 30.
	Doors not sealing properly.	Check that the cabinet is levelled and gasket seals are clean.
Storage compartment(s) too warm.	Temperature setting not correct.	See 'Operating instructions' section on page 30.
	Frequent door openings.	Minimise door openings to allow temperatures to stabilise.
	Large amount of food recently added.	
Food freezing in the refrigerator.	Temperature setting not correct.	See 'Operating instructions' section on page 30.
	Food placed directly in front of air outlets.	Move chill sensitive foods away from the centre back of the shelf. Refer to 'Storing food in your refrigerator compartment and variable-temperature drawer' on page 39.

TROUBLESHOOTING

PROBLEM	POSSIBLE CAUSE	WHAT TO DO
Unfamiliar noises.	Cabinet not stable or level.	Ensure cabinet is on even flooring.
	Freezer is defrosting.	This is normal.
Water in the vegetable bins.	Condensation is formed by the water produced by fruit and vegetables.	A small amount of condensation is beneficial for fruit and vegetable storage. If there is too much water, store fruit and vegetables loosely wrapped in plastic bags.
		Wipe out water with a cloth.
Condensation inside fresh food compartment.	Frequent or long door openings.	Minimise door openings.
	Door gasket leaking.	Check that gasket is sitting flat and sealing tightly.
	Not unusual during periods of high humidity.	Wipe dry.
Ice buildup inside freezer compartment.	Freezer door not closing tightly.	Move items in the freezer so that the door can close tightly.
		Check and clean door gasket seal.
PROBLEM	POSSIBLE CAUSE	WHAT TO DO
If you hear...		
Abnormal sound.	The refrigerator is not located either in a levelled cabinet or on level flooring.	Ensure cabinet is on even flooring.
	The refrigerator touches some object(s) around it.	Remove objects around it. Refer to 'Installation instructions' on page 7.
Slight sound similar to that of flowing water.	This is the sound of the refrigerating system.	This is normal.

You automatically receive a 2 year Manufacturer's Warranty with the purchase of this refrigerator covering parts and labour for servicing within the country of purchase.

For spare parts, please contact Fisher & Paykel Customer Care. Spare parts are available for all Fisher & Paykel refrigerators for a minimum period of 10 years from the date of manufacture.

Fisher & Paykel undertakes to:

Repair or, at its option, replace without cost to the owner either for material or labour any part of the product, the serial number of which appears on the product, which is found to be defective within TWO YEARS of the date of purchase.

Note: this Manufacturer's Warranty is an extra benefit and does not affect your legal rights.

This Manufacturer's Warranty DOES NOT cover

- Ⓐ Service calls which are not related to any defect in the product. The cost of a service call will be charged if the problem is not found to be a product fault. For example:
 - ① Correcting the installation of the product.
 - ② Instructing you how to use the product.
 - ③ Replacing house fuses or correcting house wiring or plumbing.
 - ④ Correcting fault(s) caused by the user.
 - ⑤ Noise or vibration that is considered normal, eg drain/fan sounds, refrigeration noises or user warning beeps.
 - ⑥ Correcting damage caused by pests, eg rats, cockroaches, etc.
 - ⑦ Replacement light bulbs.
- Ⓑ Defects caused by factors other than:
 - ① Normal domestic use; or
 - ② Use in accordance with the product's user guide.
- Ⓒ Defects to the product caused by accident, neglect, misuse or 'act of God'.
- Ⓓ The cost of repairs carried out other than by a Fisher & Paykel trained and supported service technician or the cost of correcting such repairs.
- Ⓔ Normal recommended maintenance as set out in the product's user guide.
- Ⓕ Repairs when the appliance has been dismantled, repaired or serviced by other than a Fisher & Paykel trained and supported service technician or the selling dealer.
- Ⓖ Pick-up and delivery.
- Ⓗ Transportation or travelling costs involved in the repair when the product is installed outside the Fisher & Paykel trained and supported service technician's normal service area.
- Ⓘ Filter replacement except in the case of faulty parts or materials within the filter cartridge.
- Ⓣ Damage (including water damage) caused by faulty installation or plumbing.

Nothing in this Manufacturer's Warranty is intended to, or does limit, any rights you may have under law to recover the costs of inspecting or returning the goods to us.

This product has been designed for use in a normal domestic (residential) environment. This product is not designed for any commercial use (whatsoever). Any commercial use by a customer will affect this product's Manufacturer's Warranty.

MANUFACTURER’S WARRANTY – NZ AU GB IE EU HK IN SG

Service under this Manufacturer’s Warranty must be provided by a Fisher & Paykel trained and supported service technician (refer to the ‘Customer Care’ section at the back of this book). Such service shall be provided during normal business hours. This Manufacturer’s Warranty certificate should be shown when making any claim.

For Australian Customers

This Manufacturer’s Warranty is an extra benefit and does not affect your legal rights. Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Please keep this user guide in a safe place.

EUROPEAN DIRECTIVE 2012/19/EU ON WASTE ELECTRICAL AND ELECTRONIC EQUIPMENT (WEEE)

GB This appliance is marked according to the European directive 2012/19/EU on Waste Electrical and Electronic Equipment (WEEE). By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate handling of this product.

The symbol  marked on the serial plate, or on the documents accompanying the product, indicates that this appliance cannot be treated as household waste. It shall be handed over to the applicable collection point for the recycling of electrical and electronic equipment. Disposal of the appliance shall be carried out in accordance with the local environment regulations for waste disposal and ensure the refrigerant circuit is not damaged.

For more detailed information about treatment, recovery and recycling of this product, please contact your local city office, your household waste disposal service or your Fisher & Paykel retailer/dealer from whom you purchased this product.
